

## Job Description

**Role:** Oracle Data Integrator Developer

**Total years of Experience:** 3+

**Location:** Chennai

**Mode of Work:** WFO

**Notice Period:** Immediate joiner or 15 days max

### **About the Company:**

#### **Code Board Technology:**

Our vision at Code Board Tech is to deliver products that are simple, initiative and customer focused. We are professionals with a passion for innovation who ruthlessly tackle the challenges thrown at us and come up with out-of-the box solutions that are unambiguous and apt. One of our strong suits is periodic feedback analysis and incorporation, which gets us one step closer to our end users. We offer a wide array of products which are tailor-made to suit specific business needs. Customization can be performed by non-technical members with ease, thereby reducing the overhead on the customer's end. We offer new releases and versions of our products periodically with backward compatibility which ensures that our customers always get the best in the industry.

### **Job Summary:**

We are seeking a skilled and experienced ODI Developer to join our dynamic team. The ideal candidate should have a strong background in Oracle Data Integrator and possess a minimum of 3 years of hands-on experience in designing, developing, and implementing data integration solutions.

The ODI Developer will play a crucial role in ensuring the efficient flow of data across various systems, supporting business intelligence and analytics initiatives.

### **Responsibilities:**

#### **1. ODI Development:**

- Design, develop, and implement ETL (Extract, Transform, Load) processes using Oracle Data Integrator.
- Create and optimize ODI interfaces, packages, and procedures for efficient data integration.

#### **2. Data Modeling:**

- Work closely with data architects and analysts to understand data requirements and translate them into effective ODI solutions.
- Implement and maintain data models to support business needs.

#### **3. Performance Tuning:**

- Identify and resolve performance bottlenecks in ODI processes.
- Optimize SQL queries and data transformation logic for better efficiency.

#### **4. Collaboration:**

- Collaborate with cross-functional teams, including database administrators, business analysts, and developers, to ensure seamless integration of data across systems.

#### **5. Monitoring and Maintenance:**

- Monitor ODI jobs and workflows to ensure data integration processes are running smoothly.
- Perform routine maintenance tasks and troubleshoot issues as they arise.

#### **6. Documentation:**

- Create and maintain documentation for ODI processes, including design specifications, technical documentation, and change logs.

### **Qualifications:**

#### **1. Education:**

- Bachelor's degree in Computer Science, Information Technology, or a related field.

#### **2. Experience:**

- Minimum of 3 years of hands-on experience in Oracle Data Integrator (ODI) development.

#### **3. Communication Skills:**

- Excellent communication skills, both written and verbal.
- Ability to effectively collaborate with cross-functional teams.

#### **4. Problem-Solving:**

- Strong analytical and problem-solving skills.
- Ability to troubleshoot and resolve issues in a timely manner.

### **Roles and Responsibilities**

- 3+ years ETL developer experience and a minimum of 3+ years of experience in Oracle Data Integrator (ODI)
- Expertise in the Oracle ODI toolset and Oracle PL/SQL, ODI
- Strong knowledge of ELT/ETL concepts, design and coding
- Experience in database development (SQL/ PLSQL) for PL/SQL based applications.
- Need to have DWH Implementation experience.
- Should have experience in developing ETL processes
- Knowledge of data modelling and ETL design
- Experience in Data Migration u

#### ❖ **Mandatory:**

- ✓ Hands on development experience in ETL using ODI 11G/12C
- ✓ Oracle SQL and PL/SQL programming experience
- ✓ Proficiency in warehousing architecture techniques
- ✓ Experience in Data Warehouse and/or Data Marts
- ✓ Good communication skills and should be self-sufficient to collaborate with project teams.

#### ❖ **Good to have:**

- ✓ Experience in database modeling – Enterprise Data Warehouse
- ✓ Exposure to any other ETL tool like Informatica
- ✓ MYSQL or SQL Server hands-on

#### **Job Description:**

- Hands on development experience in ETL using ODI 11G/12C
- Oracle SQL and PL/SQL programming experience
- Proficiency in warehousing architecture techniques
- Experience in Data Warehouse and/or Data Marts
- Good communication skills and should be self-sufficient to collaborate with project teams.
